| 42-48 | Development and Validity of the Family Stigma in Alzheimer's Disease Scale (FS-ADS)                                                                         |
| 49-57 | Reliability and Validity of Food Frequency Questionnaire and Nutrient Biomarkers in Elders With and Without Mild Cognitive Impairment                       |
| 58-62 | Effects of Body Weight on Tolerability of Rivastigmine Transdermal Patch: A Post-hoc Analysis of a Double-blind Trial in Patients With Alzheimer Disease    |
| 63-72 | Long-term Outcome and Prediction Models of Activities of Daily Living in Alzheimer Disease With Cholinesterase Inhibitor Treatment                          |
| 73-84 | Derivation of a New ADAS-cog Composite Using Tree-based Multivariate Analysis: Prediction of Conversion From Mild Cognitive Impairment to Alzheimer Disease |
| 85-92 | Fractality and a Wavelet-chaos-Methodology for EEG-based Diagnosis of Alzheimer Disease                                                                     |
| 93-95 | Prion Protein Codon 129 Polymorphism Modifies Age at Onset of Frontotemporal Dementia With the C.709-1G>A Progranulin Mutation                              |
| 96-99 | MAPT V363I Variation in a Sporadic Case of Frontotemporal Dementia: Variable Penetrant Mutation or Rare Polymorphism?                                       |

## American Journal of Alzheimer's Disease & Other Dementias

Vol. 25 no 8. December 2010

Abstracts available online at <http://aja.sagepub.com/content/current>

|         |                                                                                                                                                   |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| 625-26  | Review of Issue: nonpharmaceutical & pharmaceutical interventions for dementia patients                                                           |
| 627-33  | Reviews: effects of transdermal rivastigmine on ADAS-Cog Items in Mild-to-Moderate Alzheimer's Disease                                            |
| 634-40  | Needs in Early Onset Dementia: A Qualitative Case From the NeedYD Study                                                                           |
| 641-49  | The Singer or the Singing: Who Sings Individually to Persons With Dementia and What Are the Effects?                                              |
| 650-56  | Development and Validation of the Memory Orientation Screening Test (MOST™): A Better Screening Test for Dementia                                 |
| 657-65  | Comparing Responses to Horticultural-Based and Traditional Activities in Dementia Care Programs                                                   |
| 666-73  | Hospice Care for Persons With Dementia: The Growth of Access in US Nursing Homes                                                                  |
| 674-79  | Internet-Based Program for Dementia Caregivers                                                                                                    |
| 680-86  | Physical and Psychological Effects of 6-Week Tactile Massage on Elderly Patients With Severe Dementia                                             |
| 687-97  | Coverage of Alzheimer's Disease From 1984 to 2008 in Television News and Information Talk Shows in the United States: An Analysis of News Framing |
| 698-703 | Multisensory Stimulation to Improve Functional Performance in Moderate to Severe Dementia—Interim Results                                         |

## American Journal of Alzheimer's Disease & Other Dementias

Vol. 26 no 1. February 2011

Abstracts available online at <http://aja.sagepub.com/content/current>

|       |                                                                                                                                                                         |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 7     | Review of Issue: Alzheimer's Caregiver's and Internet-Based Support Services: Do They Work?                                                                             |
| 8-9   | Letter to the editor                                                                                                                                                    |
| 10-28 | Review: Risk of Cerebrovascular Adverse Events and Death in Elderly Patients With Dementia When Treated With Antipsychotic Medications: A Literature Review of Evidence |
| 29-35 | Young Children in Early-Onset Alzheimer's Disease Families: Research Gaps and Emerging Service Needs                                                                    |
| 36-43 | Dementia Caregivers' Responses to 2 Internet-Based Intervention Programs                                                                                                |
| 44-50 | Physical Restraint Use and Falls in Nursing Homes: A Comparison Between Residents With and Without Dementia                                                             |
| 51-57 | Association of the Spatial Layout of the Home and ADL Abilities Among Older Adults With Dementia                                                                        |
| 58-64 | The Driver With Dementia: A Survey of Physician Attitudes, Knowledge, and Practice                                                                                      |
| 65-71 | Impact of Rivastigmine Patch and Capsules on Activities of Daily Living in Alzheimer's Disease                                                                          |
| 72-77 | Extrapyramidal Signs in the Primary Progressive Aphasias                                                                                                                |
| 78-82 | News Briefs                                                                                                                                                             |

## Dementia: international journal of social research and practice

Vol.9 no 4. November 2010

Abstracts available online at <http://dem.sagepub.com/content/9/4.toc>

|         |                                                                                                                      |
|---------|----------------------------------------------------------------------------------------------------------------------|
| 451-53  | My husband has young-onset dementia: A daughter, wife and mother's story                                             |
| 454-72  | The effectiveness of the Talking Mats framework in helping people with dementia to express their views on well-being |
| 473-89  | Care-giving in dementia: Contours of a curriculum                                                                    |
| 490-508 | A home away from home: The meaning of home according to families of residents with dementia                          |
| 509-16  | Ambulatory actigraphy correlates with apathy in mild Alzheimer's disease                                             |
| 517-34  | 'We've had a wonderful, wonderful thing': Formulaic interaction when an expert has dementia                          |
| 535-47  | The carer's world: An interactive reusable learning object                                                           |
| 548     | Innovative practice                                                                                                  |
| 549-557 | Applying a strength-based intervention for dyads with mild to moderate memory loss: Two case examples                |
| 558-68  | Lessons learned from implementing a psycho-educational intervention for African American dementia caregivers         |
| 569-76  | Counselling people with Creutzfeldt-Jakob Disease (CJD) and their families                                           |

## Dementia: international journal of social research and practice

Vol. 10 no 1. February 2011

Abstracts available online at <http://dem.sagepub.com/content/10/1.toc>

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3-6     | The Journal's 10 year Anniversary - Looking back and moving forward                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 7-18    | Expectations and experience of moving to a care home: Perceptions of older people with dementia                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 19-34   | The state and context of evidence production and knowledge translation in the rehabilitation of people with Alzheimer's Disease                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
